- Double sided manual booth with twin model 600 cyclone and model FWB1000 auto shake after filter.

- Double sided manual booth in stainless steel with model 900 cyclones and model CF24 cartridge after filter.

- Automatic / manual Ro / Ro booth in stainless steel with model 900 cyclone and model CF24 cartridge after filter

- Single sided manual booth with model 600 cyclone and model FWB500 auto shake after filter.

Powder Coating Booths and Recovery Equipment

We manufacture a complete range of uniquely designed booths for off line manual, conveyerised manual and automatic applications.

Why should you choose a Sangre Booth

- Manufactured from powder coated mild steel panels or stainless steel panels for durability and good powder release.
- Superior powder collection maximises powder recovery.
- Curved roof panels.
- Sealed polycarbonate lighting panels.
- Designed for rapid colour change.
- Over 20 years of manufacturing experience.
- Designed to suit your parameters.
- Manual or powered roll on/ roll off available.

Why should you choose Sangre Recovery Equipment

- Range of high efficiency quick colour change mono & twin cyclones. Air volumes between 850 m³/hour to 24,000 m³/hour.
- Colour change ductwork between booth and cyclone inlet.
- Range of Auto shake after filters using the latest anti static polyester filter media. Ideal for manual and small automatic booths. Air volumes between 1000 m³/hour to 18,000 m³/hour.
- Designed for rapid colour change.
- Range of cartridge after filters using the latest anti static polyester filter media technology. Air volumes between 1700 m³/hour and 25,000 m³/hour. Available with pulse jet or swing wing cleaning systems. Can be close coupled onto booth to become integral part of powder coating booth. Interchangeable filter sections available. Ideal for automatic booths when compact design is required.
- Over 20 years of manufacturing experience.
- Secondary filters.

Automatic recycling of recovered powder from cyclone bins and cartridge after filters available.

For more details on recovery systems see Turboway High Efficiency Cyclones, Dustaway Auto Shake Filter Units & CF Cartridge Filter Units literature.
